

In this section, you will practice speaking about a technical topic in a clear and organized way. You will prepare a short oral presentation to explain what TypeScript is, compare it with JavaScript, and justify a technical choice. This activity will help you develop confidence when speaking in professional and academic contexts, using simple and effective language.

Oral Presentation – TypeScript vs JavaScript

Work individually or in pairs.

Prepare a short presentation (2–3 minutes):

1. **Introduction:** What is TypeScript?
2. **Development:** Advantages and basic features
3. **Conclusion:** Why developers use it

Use expressions such as:

In my opinion...

One advantage is...

In conclusion...

Self-assessment Checklist

- ☐ I can explain what TypeScript is.
- ☐ I can compare TypeScript and JavaScript.
- ☐ I can justify a technical choice in English.
- ☐ I can give a short oral presentation.
